

Building a Healthier Lodi

Local Action with Lasting Impact

About CHC

Creating Healthy Communities (CHC) is funded by the Centers for Disease Control and Prevention (CDC). In Ohio, there are 31 CHC-funded counties, including Medina County.

Community Progress

Medina County Public Health is working with Lodi Health and Motion to improve walking, biking, and opportunities for active living in Lodi.

2025

Community members participated in a walk audit to identify opportunities for improvement.

2026

A community survey identified local walking and biking needs. Results on the back of this flyer will help guide future improvements in Lodi.

How We're Taking Action

Community Partnerships

- School partnerships and coalitions
- Resident engagement across Lodi

Funding Improvements

- Grant opportunities for local projects
- Long-term investment in community improvements

Healthy Living Planning

- Community strategies for active living
- Future projects and local priorities

Healthy Food Access

- Community gardens
- Fresh food access and local partnerships

Safer Walking and Biking

- Safer routes for walking and biking
- Better connections throughout Lodi

What We Heard About Biking in Lodi

89% of survey respondents ranked their comfort level at a 5 out of 10 or below.

What is your comfort level riding bikes in the Lodi area?

Infrastructure and the speed of traffic were top biking concerns.

What are the barriers or concerns to you biking more?

Survey respondents want to be able to bike to community destinations.

If it was more comfortable to ride your bike in the area, where would you ride your bike to?

Survey respondents said:

- "I wish it felt safe to ride my bike into Lodi—I worry most about traffic and distracted drivers."
- "It would be nice to connect to other bike trails."
- "A local trail system would benefit not only the local community—it would draw riders from outside the area it would have real economic impact on the Village of Lodi."
