

Weekly Influenza Activity Report

MMWR Week 20 (5/12/19-5/18/19)

Date Completed: 5/24/19

Summary:

Public health surveillance data indicates levels of influenza like illness (ILI) are trending above the historical 5 year average for Medina County for ILI emergency department (ED) visits and trending below the historical 5 year average for Influenza hospitalizations. The percentage of ILI emergency department (ED) visits among Medina County residents are above the statewide levels (Figure 1). The geographic distribution of ILI ED visits has decreased with influenza activity found in less than half of the county's zip codes (Figure 2). There were 0 influenza-associated hospitalizations and 0 novel influenza infections reported to the Medina County Health Department during week 20. The incidence of influenza associated hospitalizations is below the 5 year average (Figure 3). The highest frequency of ILI associated hospitalizations are among adults 65 years and older while the highest frequency of ILI ED visits are among children less than 18 years of age (Figure 4). Over-the-counter medication sales for adults are trending downward and over-the-counter medication sales for children are trending downward.

Dashboard:

Indicator	Current Week	Previous Week	Trend (# of weeks)	Season to Date
Number of ILI ED visits ¹	27	15	 1	1019
Percentage of ILI ED visits ¹	1.80%	1.10%	 1	-
Number of Influenza Hospitalizations ²	0	0	 3	146
Number of Novel Influenza Infections ²	0	0	 32	0
Number of Over-the-Counter ³ Medication Sales (Adult)*	1472	1581	 1	55839
Number of Over-the-Counter ³ Medication Sales (Children)*	107	129	 1	4322

Over-the-counter (OTC) medication sales do not reflect all OTC medication sales within the county. Please see Figures 5 and 6 for specific medications that are being tracked and monitored. All numbers are preliminary and subject to change.

State, Regional, and National Data:

Ohio Surveillance Data:

ODH lab has reported **1325 positive** influenza test from specimens sent from various submitters. 2018-2019 influenza season results: **(618) A/pdmH1N1; (695) A/H3N2; (12) Influenza B;** (through 5/18/2019).

The **National Respiratory and Enteric Virus Surveillance System (NREVSS)** has reported **79,243** influenza tests performed at participating facilities. 2018-2019 influenza season positive results: **(447) A/pdmH1N1, (571) A/H3N2, (12738) Flu A Not Subtyped, and (308) Flu B** (through 5/18/2019).

4 pediatric influenza-associated mortalities have been reported during the 2018-2019 season (through 5/18/2019).

No **novel influenza A virus infections** have been reported during the 2018-2019 season (through 5/18/2019).

Incidence of confirmed **influenza-associated hospitalizations** in 2018-2019 season = **9865** (through 5/18/2019).

HHS Regional Surveillance Data*: During week 19 (**May 5th – May 11th, 2019**), the proportion of outpatient visits for ILI in Region 5 (Ohio is in Region 5) was 1.06%, which is **below** the regional baseline of 1.8%. Ohio, Kentucky Pennsylvania, and Michigan reported Local Activity; Indiana and West Virginia reported Sporadic Activity.

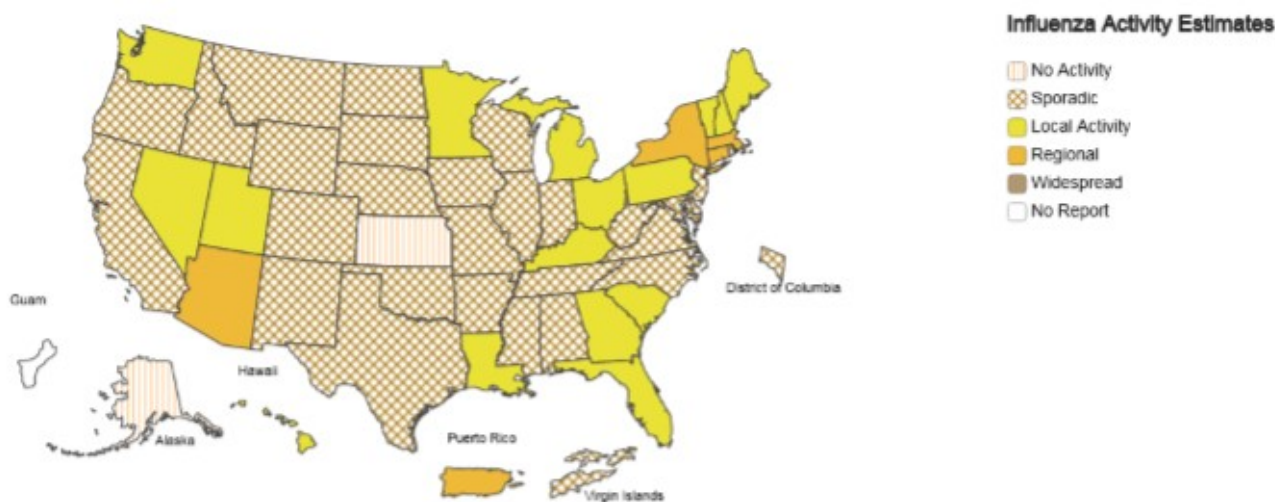

National Surveillance Data*: During week 19 (**May 5th – May 11th, 2019**), most U.S. States reported Minimal influenza activity. The proportion of outpatient visits for ILI was 1.5%, which is **below** the national baseline of 2.2%. All regions reported ILI below their region-specific baseline levels. The most frequently identified virus was influenza A(H3).

*National-level and regional-level data are reported one week later than Ohio state-level.

A Weekly Influenza Surveillance Report Prepared by the Influenza Division

Weekly Influenza Activity Estimates Reported by State and Territorial Epidemiologists*

Week Ending May 11, 2019 - Week 19

*This map indicates geographic spread and does not measure the severity of influenza activity.

Data Sources:

- 1. Emergency Department Visits (EpiCenter):** EpiCenter collects emergency department chief complaint data from hospitals and urgent care facilities across Medina County and classifies them into symptom and syndrome categories. Rates for chief complaints regarding fever + ILI and other symptoms commonly detected during the flu season are analyzed.
- 2. Influenza-Associated Hospitalizations (ODRS):** Influenza-associated hospitalizations and novel influenza infections are reported by the Medina County Health Department and hospitals using the Ohio Disease Reporting System (ODRS). Hospitalizations can be used as an indicator of the severity of illness during a particular influenza season. This condition became reportable in January 2009.
- 3. National Retail Data Monitor (NRDM):** NRDM collects over-the-counter medication sales at drug stores located within Medina County. Medication sales are broken down by adult and pediatric.
