

Summary:

Public health surveillance data indicates levels of influenza like illness (ILI) are trending above the historical 5 year average for Medina County for ILI emergency department (ED) visits and trending above the historical 5 year average for Influenza hospitalizations. The percentage of ILI emergency department (ED) visits among Medina County residents are below the statewide levels (Figure 1). The geographic distribution of ILI ED visits has stayed the same with influenza activity found in almost all of the county's zip codes (Figure 2). There were 15 influenza-associated hospitalizations and 0 novel influenza infections reported to the Medina County Health Department during week 9. The incidence of influenza associated hospitalizations is above the historical average. (Figure 3). The highest frequency of ILI associated hospitalizations are among adults 65 years of age and older and the highest frequency of ILI ED visits were among children less than 18 years of age (Figure 4). Over-the-counter medication sales for adults are trending upward and over-the-counter medication sales for children are trending downward.

Dashboard:

Indicator	Current Week	Previous Week	Trend (# of weeks)	Season to Date
Number of ILI ED visits ¹	43	57	 3	829
Percentage of ILI ED visits ¹	3.0%	3.8%	 3	-
Number of Influenza Hospitalizations ²	15	10	 1	96
Number of Novel Influenza Infections ²	0	0	 22	0
Number of Over-the-Counter ³ Medication Sales (Adult)*	1968	1760	 1	41826
Number of Over-the-Counter ³ Medication Sales (Children)*	202	218	 1	3166
Number of Influenza Deaths	0	1	 1	1
Number of Pneumonia Deaths	0	0	 1	7

Over-the-counter (OTC) medication sales do not reflect all OTC medication sales within the county. Please see Figures 5 and 6 for specific medications that are being tracked and monitored. All numbers are preliminary and subject to change.

State, Regional, and National Data:

Ohio Surveillance Data:

- **ODH lab** has reported **810 positive** influenza tests from specimens sent from sentinel ILINet providers and hospital clinical labs. 2019-2020 influenza season results: **(453) A/pdmH1N1; (17) A/H3N2; (340) Influenza B;** (through 2/29/2020).
- The **National Respiratory and Enteric Virus Surveillance System (NREVSS)** has reported **67,459** influenza RT-PCR tests performed at participating facilities. 2019-2020 influenza season positive results: **(454) A/pdmH1N1; (3) A/H3N2; (7426) Flu A Not Subtyped; and (7920) Flu B;** (through 2/29/2020).
- **2 pediatric influenza-associated mortalities** have been reported during the 2019-2020 season (through 2/29/2020).
- No **novel influenza A virus infections** have been reported during the 2019-2020 season (through 2/29/2020).
- Incidence of confirmed **influenza-associated hospitalizations** in 2019-2020 season = **8545** (through 2/15/2020).

HHS Regional Surveillance Data*: During week 8 (**February 16th – February 22nd, 2020**), the proportion of outpatient visits for ILI in Region 5 (Ohio is in Region 5) decreased to 4.78%, which is **above** the regional baseline of 1.9%. Michigan, Ohio, West Virginia, Pennsylvania, Kentucky, and Indiana reported Widespread Activity.

National Surveillance Data*: During week 8 (**February 16th – February 22nd, 2020**), the majority of the U.S. reported High influenza activity. The proportion of outpatient visits for ILI decreased to 5.5%, which is **above** the national baseline of 2.4%. All 10 HHS regions reported ILI levels at or above their region-specific baseline level. While influenza B/Victoria viruses predominated earlier in the season, during recent weeks, influenza A(H1N1)pdm09 viruses have been reported more frequently than B/Victoria viruses. For the season, the number of B/Victoria and A (H1N1)pdm09 viruses are approximately equal. The predominant virus varies by region

***National-level and regional-level data are reported one week later than Ohio state-level data**

Data Sources:

- 1. Emergency Department Visits (EpiCenter):** EpiCenter collects emergency department chief complaint data from hospitals and urgent care facilities across Medina County and classifies them into symptom and syndrome categories. Rates for chief complaints regarding fever + ILI and other symptoms commonly detected during the flu season are analyzed.
- 2. Influenza-Associated Hospitalizations (ODRS):** Influenza-associated hospitalizations and novel influenza infections are reported by the Medina County Health Department and hospitals using the Ohio Disease Reporting System (ODRS). Hospitalizations can be used as an indicator of the severity of illness during a particular influenza season. This condition became reportable in January 2009.
- 3. National Retail Data Monitor (NRDM):** NRDM collects over-the-counter medication sales at drug stores located within Medina County. Medication sales are broken down by adult and pediatric.
